

ERRATA

33, p. 78. The footnote to Table 1 should read:

* Data used in age calculations: weighted mean is 439 ± 2.6 Ma (1σ) with $\chi^2 = 2.2$. Including uncertainty in standard yields 439.0 ± 8.8 Ma (2σ).

33, p. 81. The last sentence of the section entitled 'Comparisons with the Appinite Suite' should read:

However, on a plot of ϵNd v. $^{87}\text{Sr}/^{86}\text{Sr}$ (Fig. 7), all but **two** of the Kiloran Bay samples lie in the field for Caledonian Granites and related rock (Frost and O'Nions 1985).
