The Scottish Journal of Geology continues the Transactions of the Edinburgh Geological Society and the Transactions of the Geological Society of Glasgow, and is sponsored by the councils of the two Societies. It contains three parts per volume. The Journal is sent to members of both societies. Details of membership may be obtained from the secretaries, whose names appear below.

The Societies gratefully acknowledge financial help from the Kilwarlin Trust. Contributions or legacies to assist towards the cost of publication of the Journal would be welcomed by the Editorial Board.

Old stoop and room or pillar and stall mine workings in the Virtuewell Seam exposed by recent open cast workings, at Fauldheads, 2 miles north east of Shotts. The original mine was the Benhar Colliery, abandoned in 1897. The Virtuewell seam averages 0.8 m and ranges from 0.35 m to 1.39 m. It lies in the Productive Coal Measures with a seat earth immediately below and sandstones and thin coals above and below.
