

**Scottish Journal of Geology**  
**Volume 33, Part 2**  
**Pages 97–192, 1997**

CONTENTS

RITCHIE, J. D., HITCHEN, K. and EDWARDS, J. W. F. The Sigmunder Complex, a ?Tertiary igneous centre in the northern Rockall Trough . . . . .	97
VAN DE KAMP, P. C. and LEAKE, B. E. Mineralogy, geochemistry, provenance and sodium metasomatism of Torridonian rift basin clastic rocks, NW Scotland . . . . .	105
GLASSER, N. F. The origin and significance of sheer joints in the Cairngorm granite . . . . .	125
ROPER, H. Origin of the 'Berwick Monocline': geometrical and geophysical considerations . . . . .	133
BURT, R. M. and BROWN, P. E. The Ben Nevis Intrusive Ring Tuff, Scotland: reinterpretation of the 'Flinty Crush Rock' as part of an ignimbrite conduit in the roots of an ancient caldera . . . . .	149
KERR, A. C. The geochemistry and significance of plugs intruding the Tertiary Mull-Morven lava succession, western Scotland . . . . .	157
EVANS, D. J. Estimates of the eroded overburden and the Permian-Quaternary history of the area west of Orkney . . . . .	169
SHORT COMMUNICATION	
BALLANTYNE, C. K. and McCARROLL, D. Maximum altitude of the Late Devensian ice sheet on the Isle of Rum . . . . .	183
SOPER, A. L. and HARRIS, A. L. Letter to the editors . . . . .	187
INDEX
