

Scottish Journal of Geology

The primary aim of the *Journal* is to publish original papers on Scottish geology, but other topics of general or specialist interest are acceptable. Contributions should not normally exceed 12 journal pages; shorter papers are likely to be published more rapidly. 'Short Communications' of up to four pages need not be preceded by a 'synopsis'. Discussions of papers that appear in the *Journal* are invited and will be published quickly. Review papers are welcome, but authors contemplating submitting these should, at an early stage, contact the editorial board to discuss content, suitability and possible date of publication.

Instructions for contributors

Detailed instructions for contributors are published in the *Scottish Journal of Geology* Volume 29, Part 1, pp. 107–11. Intending authors must ensure that the format of their contributions complies with these instructions, as this will enable processing of the contributions with the minimum possible delay. Please note that periodical titles are now printed in full.

Discs: Discs of word-processed papers will be requested by the editor when the paper is accepted. Do not send the disc until requested to do so. Further details are available from the Staff Editor.

More information, including contents of recent issues can be found on the Journal's WWW page:

<http://www.geolsoc.org.uk>

All correspondence, typescripts and proofs should be addressed to The Editors, Scottish Journal of Geology, c/o Geological Society Publishing House, Unit 7, Brassmill Enterprise Centre, Brassmill Lane, Bath BA1 3JN.

Copies of the instructions can be obtained by writing to The Editors, Scottish Journal of Geology, c/o British Geological Survey, Murchison House, West Mains Road, Edinburgh EH9 3LA.

Back issues

Certain back numbers of the *Transactions of the Edinburgh Geological Society*, *Transactions of the Geological Society of Glasgow* and *Scottish Journal of Geology* are still available. A list of the prices and parts may be had on application to the secretaries of the Societies.

Book reviews

As space permits, the *Journal* will publish independent reviews of printed works that have a clear relevance to the geology of Scotland.

INDEX

Volume 36, 2000
Authors

- ANDERSON, L. I. 151–158
ARMSTRONG, H. A. 33–38
BLUCK, B. J. 97–101
BRADY, S. J. 115–122
CHAPMAN, R. J. 165–176
CLARK, N. D. L. 87–90
CLARKSON, E. N. K. 8–16, 33–38
CRAIG, G. Y. 102–104
DAWSON A. G. 73–86
DROOP, G. T. R. 91–94
DUNLOP, J. A. 151–158
FANNIN, N. 4–7
FERNANDEZ, L. A. D. 91–94
FETTES, D. J. 4–7
FLINN, D. 123–135
FLOYD, J. D. 51–60, 165–176
GLENNIE, K. W. 17–32
HANCOCK, J. M. 137–141
HOLLAND, C. H. H. 177–186
HUDSON, J. D. 1–3
HUDSON, N. F. C. 39–50
JEWKES, M. 87–90
KEARNS, S. L. 39–50
KNUDSEN, T. L. 61–72
LEAKE, R. C. 165–176
MACDOUGALL, J. E. 110–114
MCKIRDY, A. 105–109
MIGHALL, T. M. 73–86
OLIVER, G. 95–96
OWEN, A. W. 33–38
PARK, G. 91–94
PIRRIE, D. 143–150
POWER, M. R. 143–150
RICKARDS, B. 159–164
SELBY, K. A. 73–86
SHAW, S. 91–94
SHERWIN, L. 159–164
SMITH, D. E. 73–86
TANNER, G. 187–189
TARNEY, J. 91–94
TREWING, N. H. A. 151–158
WILLIAMS, M. 51–60

Subjects

- Achanarras Quarry, Caithness 151–158
Arbuthnott Group, Midland Valley 115–122
Australia, and Southern Scotland, *Rogercooperia* 159–164
- Banff, Buchan Dalradian, calc-silicate rocks 39–50
basement blocks, controversy 97–101
biscuits, books and beer 102–104
Bouguer anomaly gravity map, Shetland 123–135
- Caithness Flagstone Group, Middle Devonian
chamataspid arthropod 151–158
calc-silicate rocks, Buchan Dalradian 39–50
Caledonian metasediments, Shetland 61–72
Caradoc (Ordovician)
glossograptid graptolites 159–164
ostracodes from Craighead Limestone Formation,
Girvan 51–60
Carrick–Loch Doon district (*book review*) 95–96
Central Viking Graben 17–31
cephalopods, Pentland Hills 177–186
chamataspid arthropods 151–158
chromite mineralization, ultramafic rocks, Perthshire
143–150
coal, and torbanite 110–114
Coal Measures (Carboniferous), tetrapod trackways
87–90
Corrycharmaig ultramafic body, Perthshire 143–150
Craighead Limestone Formation, Girvan, ostracodes 51–60
Craigierigg Burn, gold mineralization 165–176
Cretaceous chalk, and Gribun Conglomerate Formation
137–142
- Dalradian, Southern Highland Group, diagenetic history
39–50
Devensian, Late, Sleat Peninsula, Skye 73–86
Devonian, Early, Dundee Formation, eurypterids 115–122
Devonian, Middle, chamataspid arthropod, Achanarras
Quarry 151–158
Devonian sandstones, Shetland, Sm-Nd and trace element
study 61–72
Dynamic Earth charitable trust 102–104
- environmental geology 105–109
eurypterids
Early Devonian, Midland Valley 115–122
see also chamataspid arthropods
- Fetlar, ophiolite architecture 123–135
Forfar, Tillywhandland Quarry 115–122
- Geological Survey in Scotland, (1900–2000) 4–7

- Girvan, Mid-Caradoc (Ordovician) ostracodes 51–60
 glacio–isostatic uplift, Skye 73–86
 Glen Roy district (*book review*) 187–189
 Glengaber Burn, gold mineralization 165–176
 glossograptid graptolite, Ordovician, Scotland and NSW 159–164
 gold mineralization, regional variation, Glengaber Burn 165–176
 Great Estuarine Group, Hebrides 1–3
 Greywacke Conglomerate Formation 33–38
- heazlewoodite 143–150
 Hebrides, Great Estuarine Group 1–3
 hughmillerids 115–122
 hydrocarbon exploration
 advancement of geology 17–31
 current status 4–7
- Iapetus Ocean, Caradoc 51–60
 isolation basin, sea level changes, Skye 73–86
- Lanark group 33–38
 Late Devensian and Holocene, sea level changes, isolation basin, Skye 73–86
 Laxfordian metamorphic conditions, Loch Maree Group, Lewisian Complex 91–94
 Loch Maree Group, Laxfordian metamorphic conditions 91–94
 Lower Old Red Sandstone, Ordovician limestone clasts 33–38
- Mathewichnus* and *?Pseudobradypus*, trackways 87–90
 Megget Water, gold mineralization 165–176
 Mesozoic, hydrocarbon exploration 17–31
 meteoric water, Tertiary plutons 1–3
 Midland Valley
 Early Devonian eurypterids 115–122
 see also Pentland Hills
 Mull, Island of, Gribun Conglomerate Formation, Cretaceous 137–142
- Nanograptus*, Caradoc (Ordovician) 159–164
 nautiloid cephalopods, Pentland Hills 177–186
 Nd/Nd and trace element study, Shetland, Devonian sandstones 61–72
 North Esk Inlier (NEI) 8–16, 177–186
- offshore *see* hydrocarbon exploration
 oil, coal and torbanite 110–114
 Old Red Sandstone, Lower, Ordovician limestone clasts 33–38
- ophiolite
 ultramafic rocks, platinum-group elements 143–150
 Unst, Shetland 123–136
 Ordovician
 Caradoc Series, Craighead Limestone Formation, Girvan 51–60
 glossograptid graptolite, Scotland and NSW, Australia 159–164
 limestone clasts, Lower Old Red Sandstone, Pentland Hills 33–38
 ostracodes, Craighead Limestone Formation, Caradoc (Ordovician) 51–60
- Palaeoproterozoic, Loch Maree Group, Lewisian Complex 91–94
 Pentland Hills
 North Esk Inlier 8–16, 177–186
 Ordovician limestone clasts 33–38
 Silurian cephalopods 177–186
 Permian sediments, Central Viking Graben 17–31
 platinum-group mineralization, ultramafic rocks, Perthshire 143–150
 Proterozoic metasediments, Shetland 61–72
 pterygotids 115–122
- Rogercooperia*, glossograptid graptolite, S Scotland and Australia 159–164
- Scottish Natural Heritage 105–109
 Scottish Rock Units 17–31
 basement blocks controversy 97–101
 sea level changes, isolation basin, Skye 73–86
 serpentinites, Shetland 123–135
 Shetland
 Devonian sandstones, Sm–Nd study 61–72
 Unst, ophiolite architecture 123–135
 silicification, Gribun Conglomerate Formation 137–142
 Silurian cephalopods, Pentland Hills 177–186
 Skye, Sleat Peninsula, isolation basin, sea level changes, Late Devensian and Holocene 73–86
 Sm–Nd and trace element study, Shetland, Devonian sandstones 61–72
 Southern Uplands, Megget Water, gold mineralization 165–176
 stylonurids 115–122
- Tertiary, hydrocarbon exploration 4–7, 17–31
 tetrapod trackways, Coal Measures (Carboniferous) 87–90
 torbanite 110–114
- Wether Law Linn Formation, Silurian cephalopods 177–186
