

## **Scottish Journal of Geology**

The primary aim of the *Journal* is to publish original papers on Scottish geology, but other topics of general or specialist interest are acceptable. Contributions should not normally exceed 12 journal pages; shorter papers are likely to be published more rapidly. 'Short Communications' of up to four pages need not be preceded by a 'synopsis'. Discussions of papers that appear in the *Journal* are invited and will be published quickly. Review papers are welcome, but authors contemplating submitting these should, at an early stage, contact the editorial board to discuss content, suitability and possible date of publication.

### **Instructions for contributors**

Detailed instructions for contributors are published in the *Scottish Journal of Geology* Volume 29, Part 1, pp. 107–11. Intending authors must ensure that the format of their contributions complies with these instructions, as this will enable processing of the contributions with the minimum possible delay. Please note that periodical titles are now printed in full.

**Discs:** Discs of word-processed papers will be requested by the editor when the paper is accepted. Do not send the disc until requested to do so. Further details are available from the Staff Editor.

More information, including contents of recent issues can be found on the Journal's WWW page:

**<http://www.geolsoc.org.uk>**

All correspondence, typescripts and proofs should be addressed to The Editors, Scottish Journal of Geology, c/o Geological Society Publishing House, Unit 7, Brassmill Enterprise Centre, Brassmill Lane, Bath BA1 3JN.

Copies of the instructions can be obtained by writing to The Editors, Scottish Journal of Geology, c/o British Geological Survey, Murchison House, West Mains Road, Edinburgh EH9 3LA.

### **Back issues**

Certain back numbers of the *Transactions of the Edinburgh Geological Society*, *Transactions of the Geological Society of Glasgow* and *Scottish Journal of Geology* are still available. A list of the prices and parts may be had on application to the secretaries of the Societies.

### **Book reviews**

As space permits, the *Journal* will publish independent reviews of printed works that have a clear relevance to the geology of Scotland.

# INDEX

Volume 37, 2001  
Authors

- BLACK, S. 73–78  
BROOKFIELD, M. E. 97–113  
BROWN, A. 11–18  
CARSWELL, D. A. 27–34  
CLARK, N. D. L. 19–26  
DAWSON, A. G. 11–18  
DAWSON, S. 11–18  
DROOP, G. T. R. 59–72  
DUCK, R. W. 73–78  
FLINN, D. 79–96  
HARKER, R. I. 53–57  
HOLLIDAY, D. W. 97–113  
HOLLOWAY, S. 97–113  
HOWE, J. A. 3–10  
HUDSON, N. F. C. 59–72  
INALL, M. E. 3–10  
JOHNSON, T. E. 59–72  
LEAHY, T. 53–57  
MACTAGGART, F. 11–18  
MCMILLAN, A. A. 97–113  
MIGHALL, T. M. 11–18  
OVERNELL, J. 3–10  
RAWSON, J. R. 27–34  
ROWAN, J. S. 73–78  
RUSHTON, A. W. 45–52  
SMALLWOOD, D. 27–34  
WALDMANN, G. 11–18  
WARRINGTON, G. 97–113  
WILBY, A. D. 3–10

## Subjects

- anhydrite, Late Permian 97–113  
Annan, Permo-Triassic stratigraphy 97–113  
aprites 59–72  
Argyll, glacial overdeepening 3–10
- Bajocian dinosaur 19–26  
Bearreraig Bay dinosaur find 19–26  
Bearreraig Sandstone Formation 19–26
- Canonbie, Permo-Triassic stratigraphy 97–113  
Carlisle Basin stratigraphy 97–113  
Carn Chuinneag-Inchbae Complex 53–57  
Coll, Isle of 11–18  
concretions, Late Devonian 73–78  
cumulate, Glenelg Inlier 27–34
- Dalradian, Inzie Head gneisses 59–72  
deglaciation, Devonian 73–78  
Devonian raised marine strata 73–78  
dinosaur fossil, Isle of Skye 19–26  
Dumfries and Galloway, Permo-Triassic stratigraphy 97–113
- eclogite facies, Glenelg Inlier 27–34  
Eden Shales Formation 97–113  
Errol Clay Formation 73–78  
Etive, Loch 3–10  
evaporites, Late Permian 97–113
- fossils  
dinosaur 19–26  
graptolites 45–52
- Gallowflat, Firth of Tay 73–78  
garnet-bearing olivine websterite, Glenelg Inlier 27–34  
geochemistry of websterite, Glenelg Inlier 27–34  
geothermobarometry, websterite, Glenelg Inlier 27–34  
Girvan, Cover-Sequence graptolites 45–52  
glacial overdeepening 3–10  
glacio-isostatic uplift, Isle of Coll 11–18  
Glenelg Inlier geochemistry 27–34  
granitic augen gneiss 53–57  
granulite facies, Glenelg Inlier 27–34  
graptolites, Ordovician of Girvan 45–52  
Grenville orogeny 27–34  
gypsum, Late Permian 97–113
- hastingsite granite 53–57  
Hebrides, Inner 11–18  
Highlands of Scotland, NW, geochemical studies 27–34  
Holocene peats 11–18
- igneous/regional metamorphic complex 53–57  
Inchbae mass 53–57  
Inner Hebrides peat deposits 11–18  
Inzie Head gneisses 59–72

Jurassic, Bajocian dinosaur 19–26

Late Devonian raised marine strata 73–78

leucosomes, Inzie Head gneisses 59–72

Lewisian gneiss, Glenelg 27–34

marine transgression, Isle of Coll 11–18

melt segregation structures 59–72

*Nemagraptus gracilis* zone 45–52

obduction, Shetland ophiolite 79–96

olivine websterite, Glenelg Inlier 27–34

ophiolite nappes, Shetland 79–96

Ordovician, graptolites of Girvan 45–52

peat deposits, Holocene intertidal 11–18

Permo–Triassic, stratigraphy of Carlisle Basin 97–113

radiocarbon dating 11–18

regional metamorphism 53–57

eclogite facies, Glenelg Inlier 27–34

St Bees Sandstone Formation 97–113

Scandian orogeny 79–96

sea-level change, Holocene 11–18

serpentinization of ophiolite 79–96

Shetland Ophiolite Complex 79–96

side-scan sonar imaging, Loch Etive 3–10

Skye, Isle of, new dinosaur find 19–26

Superstes Mudstone Formation 45–52

Tay, Firth of 73–78

Traigh Eileraig intertidal peats 11–18

Triassic, stratigraphy of Carlisle Basin 97–113

U-series disequilibrium dating 73–78

websterite, Glenelg Inlier 27–34
