

## **Scottish Journal of Geology**

The primary aim of the Journal is to publish papers relevant to the geology of Scotland and adjacent areas including the surrounding seas. Papers of general or specialist interest as well as short communications, letters to the editor, and discussions of earlier papers are welcome, together with reviews and thematic sets publishing the results of relevant meetings and conferences. All contributions must be original. Contributions should not normally exceed 12 journal pages; shorter papers are likely to be published more rapidly. 'Short Communications' of up to four pages need not be preceded by a 'synopsis'. Discussions of papers that appear in the *Journal* are invited and will be published quickly. Review papers are welcome, but authors contemplating submitting these should, at an early stage, contact the editorial board to discuss content, suitability and possible date of publication.

### **Instructions for contributors**

Detailed instructions for contributors are published in the *Scottish Journal of Geology* Volume 37, Part 1, pp. 39–43. Intending authors must ensure that the format of their contributions complies with these instructions, as this will enable processing of the contributions with the minimum possible delay. Please note that periodical titles are now printed in full.

More information, including contents of recent issues can be found on the Journal's WWW page:

**<http://www.geolsoc.org.uk>**

**Discs:** Discs of word-processed papers will be requested by the editor when the paper is accepted. Do not send the disc until requested to do so. Further details are available from the Staff Editor.

All correspondence, typescripts and proofs should be addressed to The Editors, Scottish Journal of Geology, c/o Geological Society Publishing House, Unit 7, Brassmill Enterprise Centre, Brassmill Lane, Bath BA1 3JN.

Copies of the instructions can be obtained by writing to The Editors, Scottish Journal of Geology, c/o British Geological Survey, Murchison House, West Mains Road, Edinburgh EH9 3LA.

### **Back issues**

Certain back numbers of the *Transactions of the Edinburgh Geological Society*, *Transactions of the Geological Society of Glasgow* and *Scottish Journal of Geology* are still available. A list of the prices and parts may be had on application to the secretaries of the Societies.

### **Book reviews**

As space permits, the *Journal* will publish independent reviews of printed works that have a clear relevance to the geology of Scotland.

# INDEX

## Volume 39, 2003 Authors

- AKHURST, M. 89–96  
ANDREWS, J. E. 151–168  
ASPEN, P. 169–184  
BARNES, R. P. 17–28  
BROWNE, M. A. E. 121–134, 151–168  
CHOPEY-JONES, A. 71–85  
CULLINGFORD, R. A. 97–120  
DAWSON, S. 97–120  
DEAN, M. T. 151–168  
ELLIOTT, D. K. 185–188  
FELDMANN, R. M. 185–188  
FLOYD, J. D. 11–15  
GUIRDHAM, C. 151–168  
HAGGART, B. A. 97–120  
HINTON, R. W. 169–184  
HOWE, M. P. A. 45–49  
JOHNSON, H. 121–134  
LOYDELL, D. K. 17–28  
MIGHALL, T. M. 97–120  
MONAGHAN, A. A. 121–134  
PEACOCK, J. D. 1–10  
RICKARDS, R. B. 61–69  
RIGBY, S. 11–15, 51–60  
RITCHIE, J. D. 121–134  
RUSHTON, A. W. A. 17–28, 29–40, 41–44, 87–88  
SMITH, D. E. 97–120  
STONE, P. 11–15, 29–40  
STRACHAN, R. A. 145–149  
TIPPING, R. M. 97–120  
TREAGUS, J. E. 135–144  
UPTON, B. G. J. 169–184  
WELLS, J. M. 97–120  
WILLIAMS, M. 17–28, 71–85, 89–96  
WRIGHT, A. J. 61–69  
ZALASIEWICZ, J. 17–28, 45–49, 71–85, 89–96

## Subjects

- alkali basalt, significance of mantle xenoliths 169–184  
Arenig, graptolite fauna of Ballantrae Complex 29–40  
Arthropoda, Jurassic from Raasay 185–188  
Asbian, palaeoenvironment analysis 151–168  
*Awarograptus nodifer* 45–49  
Ballantrae Complex ophiolite, biostratigraphic controls on 29–40  
basalts, alkali, significance of mantle xenoliths 169–184  
basement, metamorphic rocks of Orkney Islands 145–149  
biostratigraphy, graptolites  
  an overview 11–15  
  Silurian 71–85  
*Campograptus harpago* 71–85  
*Campograptus lobiferus* 71–85  
carbonates, microbial, and Carboniferous palaeoenvironment 151–168  
Carboniferous  
  alkali basalts 169–184  
  palaeoenvironment analysis 151–168  
  seismic reflection record in Firth of Forth 121–134  
*Coronograptus cyphus* 89–96  
Decapoda, Jurassic from Raasay 185–188  
deformation, metamorphic basement of Orkney Islands 145–149  
Devensian, Late, Errol Clay Formation at Gallowflat Claypit 1–10  
Devonian, Late, seismic reflection record in Firth of Forth 121–134  
Errol Clay Formation at Gallowflat Claypit 1–10  
  evolution, Silurian graptolites 61–69, 89–96  
  faults, kinematic study of Loch Tay 135–144  
  Fife district, Carboniferous palaeoenvironment analysis 151–168  
  Forth, Firth of, Devonian-Carboniferous seismic reflection record 121–134  
  Gallowflat Claypit, Errol Clay Formation exposure 1–10  
  garnet, megacrysts in alkali basalt 169–184  
  geometry, Loch Tay fault 135–144  
  Girvan district, new graptolite fauna 87–88  
  glacial recession, Late Devensian Tay Estuary evidence 1–10  
  Graemsay, metamorphic basement 145–149  
  Grampian orogeny, metamorphic basement of Orkney Islands 145–149  
  graptolites  
    astogenetic metamorphosis 45–49  
    biostratigraphic overview 11–15  
    as biostratigraphic tool in Ballantrae Complex 29–40  
    biostratigraphy, palaeobiogeography and morphology in Silurian 71–85  
    evolution in Silurian 61–69, 89–96  
    functional morphology and population structure 51–60  
    occurrences in the Superstes Mudstone Formation 87–88  
    Ordovician of Southern Uplands 41–44  
    Southern Uplands Terrane correlations 17–28  
  Holocene, sea-level change record 97–120  
  *Huttagraptus praematurus* 89–96  
  Jurassic, arthropod from Raasay 185–188

- kinematics, Loch Tay fault 135–144
- Llandoverly  
 graptolite biostratigraphy, palaeobiogeography and morphology 71–85  
 graptolite evolution 89–96  
 graptolite metamorphosis 45–49
- Loch Tay Fault, a kinematic study 135–144
- mantle xenoliths in alkali basalt 169–184
- megacrysts, mantle derived in alkali basalt 169–184
- metamorphic rocks, basement of Orkney Islands 145–149
- metamorphosis, astogenetic 45–49
- Midland Valley  
 alkali basalts 169–184  
 Devonian-Carboniferous seismic reflection record 121–134
- morphology, Silurian graptolites 51–60, 71–85
- Nith Valley, Holocene sea-level change record 97–120
- ophiolite, Ballantrae, biostratigraphic controls on 29–40
- Ordovician  
 graptolite fauna of Ballantrae Complex 29–40  
 graptolite fauna of Southern Uplands 41–44
- Orkney, metamorphic basement 145–149
- palaeobiogeography, Silurian graptolites 71–85
- palaeoenvironment analysis, Carboniferous 151–168
- Permian, alkali basalts 169–184
- population structure, graptolites in Southern Uplands 51–60
- Pristiograptus dubius* 61–69
- Pseudoclimacograptus setosus* 41–44
- Pseudoglyphea foersteri* 185–188
- pyrope, megacrysts in alkali basalt 169–184
- pyroxenite xenoliths, mantle derived in alkali basalt 169–184
- Raasay, Jurassic arthropod 185–188
- Rastrites maximus* 51–60
- Rhuddanian, graptolite evolution 89–96
- Sandy Craig Formation, palaeoenvironment analysis 151–168
- Sanquhar area, a new graptolite locality 41–44
- Scandian orogeny, metamorphic basement of Orkney Islands 145–149
- sea-level change, Holocene record in Nith Valley 97–120
- seismic reflections, Devonian-Carboniferous record in Firth of Forth 121–134
- Silurian  
 graptolite biostratigraphy, palaeobiogeography and morphology 71–85  
 graptolite evolution 61–69, 89–96  
 graptolite metamorphosis 45–49  
 graptolite morphology and population in Southern Uplands 51–60  
 graptolites in stratigraphic correlation 17–28
- Southern Uplands  
 a new Ordovician graptolite 41–44  
 graptolites in stratigraphic correlation 17–28  
*Rastrites maximus* population structure 51–60
- Strathclyde Group, palaeoenvironment analysis 151–168
- stromatolites, Carboniferous 151–168
- Superstes Mudstone Formation, new graptolite fauna 87–88
- Tay Estuary, Late Devonian glacial recession evidence 1–10
- tectonic evolution, Devonian-Carboniferous of Firth of Forth 121–134
- Telychian, graptolite metamorphosis 45–49
- Torquigraptus* species, in stratigraphic correlation 17–28
- Viséan, palaeoenvironment analysis 151–168
- xenoliths, mantle derived in alkali basalt 169–184
- Yapeenian, graptolite fauna of Ballantrae Complex 29–40
