

INDEX

Volume 40, 2004

Authors

- ARKLEY, S. 23–42
BANKS, C. J. 159–174
BARON, M. 145–157
BARRON, H. F. 7–12, 23–42
BATCHELOR, R. A. 43–48, 67–72, 181–184
BOOTH, C. 13–21
BOOTH, P. 13–21
BOTTING, J. P. 115–118
CASTRO, A. 49–65
CLARK, N. D. L. 13–21
DARABI, M. H. 83–92
EVANS, J. 43–48
FLOYD, J. D. 7–12, 97–114
FRETWELL, P. 175–179
JONK, R. 123–130
KELLY, J. 123–130
KIRK, W. 131–143
LISTON, J. J. 119–122
MALETZ, J. 185–186
PARNELL, J. 123–130, 145–157
PETERSON, I. R. 175–179
PHILLIPS, E. R. 7–12, 23–42
PIPER, J. D. A. 83–92
PIRRIE, D. 1–5
POWER, M. E. 1–5
PRESCOTT, D. 131–143
ROSS, D. A. 13–21
RUSHTON, A. W. A. 97–114, 187–188
SMALLWOOD, J. R. 131–143
SMITH, D. E. 175–179
SMITH, R. A. 23–42, 97–114
STONE, P. 187–188
TREWIN, N. H. 73–81
WHEATLEY, C. 97–114
WILLIAMS, M. 97–114
WINCHESTER, J. A. 159–174
WILSON, E. 73–81
WOOD, B. 97–114

Subjects

- air-fall tuff, Southern Highland Group 67–72, 181–184
Amphispongia oblonga 115–118
apatite geochemistry 43–48
Arenig graptolites of Ballantrae Complex 185–186, 187–188
Ballantrae Complex
 Arenig graptolites 185–186, 187–188
 platinum group minerals 1–5
Bathonian
 Skye dinosaur footprints 13–21
 Skye sauropod limb bone 119–122
biostratigraphy, Upper Ordovician graptolites 97–114
Birnam (Perthshire), Dalradian tuffs 67–72
book reviews 93–96, 189–190
Canisp Porphyry, palaeomagnetic studies 83–92
Caradoc graptolite biostratigraphy 97–114
Cetiosaurus 119–122
chromitite, Ballantrae platinum group minerals study 1–5
clastic dykes of Gairloch, tectonic significance 123–130
conglomerate, fluid flow in fractures 145–157
Dalradian Supergroup tuffs 67–72, 181–184
Devonian
 fluid flow in conglomerate 145–157
 Midland Valley sandstone provenance 23–42
 Rhynie chert beds palaeoenvironment analysis 73–81
dinosaurs
 Jurassic footprints from Skye 13–21
 Jurassic limb bone from Skye 119–122
Dob's Linn metabentonite geochemistry 43–48
Duntulm Formation dinosaur footprint 13–21
erlichmanite, Ballantrae platinum group minerals study 1–5
extensional tectonics, Highland Boundary Fault Zone 145–157
Faeroe–Shetland Basin, petroleum exploration 131–143
flora, of Devonian Rhynie cherts 73–81
fluid flow, Old Red Sandstone conglomerate 145–157
Gairloch clastic dykes and tectonics 123–130
Garva Bridge Psammite Formation 159–174
Gaussian trend surface 175–179
geochemistry
 apatite from metabentonite 43–48
 Southern Highland Group tuffs 67–72
glacio-isostasy, Main Postglacial Shoreline 175–179
Glen Buck Pebbly Psammite Formation 159–174
Glenshirra Group 159–174
granite sources study in Lewisian complex 49–65
graptolites
 Ballantrae Complex 185–186, 187–188
 Southern Uplands Ordovician biostratigraphy 97–114
Highland Boundary Fault Zone, fluid flow in conglomerate 145–157
Inverness-shire Neoproterozoic sedimentology 159–174
iridium-bearing phases, Ballantrae Complex 1–5
isostatic rebound, Main Postglacial Shoreline 175–179

- Jurassic
 Skye dinosaur footprints 13–21
 Skye sauropod limb bone 119–122
- kashinite, Ballantrae platinum group minerals study 1–5
- Lamington Conglomerate 7–12
- Lanark Group 23–42
- Laurentian Foreland, palaeomagnetic evidence 83–92
- laurite, Ballantrae platinum group minerals study 1–5
- letters to editor 185–186, 187–188
- Lewisian complex granite sources study 49–65
- Llandovery sponge taxonomy 115–118
- magma chamber evolution, geochemistry study at Dob's Linn 43–48
- Main Postglacial Shoreline 175–179
- Marchburn Formation 7–12
- mathematical modelling, glacio-isostasy 175–179
- metabentonite, Dob's Linn geochemistry study 43–48
- microthermometry 145–157
- Midland Valley, sandstone provenance study 23–42
- Nd isotopes
 apatite from metabentonite 43–48
 Lewisian complex granite 49–65
- Neoproterozoic, sedimentology of Glenshirra Group 159–174
- oil exploration, West of Shetland 131–143
- Old Red Sandstone (Lower) conglomerate fluid flow 145–157
- ophiolite, Ballantrae platinum group minerals study 1–5
- Ordovician
 age of Marchburn Formation in Southern Uplands 7–12
 graptolite biostratigraphy
 Ballantrae Complex 185–186, 187–188
 Southern Uplands 97–114
- osmium-bearing phases, Ballantrae Complex 1–5
- palaeobotany, of Devonian Rhynie cherts 73–81
- Palaeocene, oil exploration West of Shetland 131–143
- palaeoenvironment analysis, Devonian 73–81
- palaeomagnetism, Silurian 83–92
- palaeontology, Silurian sponge 115–118
- Pentland Hills Silurian sponge 115–118
- petroleum exploration, West of Shetland 131–143
- plant fossils, of Devonian Rhynie cherts 73–81
- platinum group minerals (PGM), Ballantrae Complex 1–5
- provenance, Silurian–Devonian sandstones of Midland Valley 23–42
- rare earth elements, apatite from metabentonite 43–48
- Rhynie Cherts Unit 73–81
- ruthenium-bearing phases, Ballantrae Complex 1–5
- sandstone, Silurian–Devonian of Midland Valley 23–42
- sauropod, Jurassic from Skye 119–122
- sedimentology, Glenshirra Group 159–174
- Shetland Basin, West of, petroleum exploration 131–143
- Silurian
 Midland Valley sandstone provenance 23–42
 palaeomagnetism of Canisp Porphyry 83–92
 sponge taxonomy 115–118
- Skye, Isle of
 Jurassic dinosaur footprints 13–21
 Jurassic sauropod limb bone 119–122
- Southern Highland Group 67–72, 181–184
- Southern Uplands
 Ordovician graptolite biostratigraphy 97–114
 Ordovician Marchburn Formation 7–12
- sponges, Silurian taxonomy 115–118
- Sr–Nd ratios, apatite from metabentonite 43–48
- $^{87}\text{Sr}/^{86}\text{Sr}$ ratios, Lewisian complex 49–65
- Tappins Group 7–12
- taxonomy, Silurian sponge 115–118
- tectonics
 extension and Highland Boundary Fault Zone 145–157
 significance of clastic dykes 123–130
- Torridonian clastic dykes 123–130
- tuff, Southern Highland Group air-fall 67–72, 181–184
- Wether Law Linn Formation 115–118

Scottish Journal of Geology

The primary aim of the Journal is to publish papers relevant to the geology of Scotland and adjacent areas including the surrounding seas. Papers of general or specialist interest as well as short communications, letters to the editor, and discussions of earlier papers are welcome, together with reviews and thematic sets publishing the results of relevant meetings and conferences. All contributions must be original. Contributions should not normally exceed 12 journal pages: shorter papers are likely to be published more rapidly. 'Short Communications' of up to four pages need not be preceded by a 'synopsis'. Discussions of papers that appear in the *Journal* are invited and will be published quickly. Review papers are welcome, but authors contemplating submitting these should, at an early stage, contact the editorial board to discuss content, suitability and possible date of publication.

Instructions for contributors

Detailed instructions for contributors are published in the *Scottish Journal of Geology* Volume 37, Part 1, pp. 39–43. Intending authors must ensure that the format of their contributions complies with these instructions, as this will enable processing of the contributions with the minimum possible delay. Please note that periodical titles are now printed in full.

More information, including contents of recent issues can be found on the Journal's WWW page:

<http://www.geolsoc.org.uk>

Discs: Discs of word-processed papers will be requested by the editor when the paper is accepted. Do not send the disc until requested to do so. Further details are available from the Staff Editor.

All correspondence, typescripts and proofs should be addressed to The Editors, Scottish Journal of Geology, c/o Geological Society Publishing House, Unit 7, Brassmill Enterprise Centre, Brassmill Lane, Bath BA1 3JN.

Copies of the instructions can be obtained by writing to The Editors, Scottish Journal of Geology, c/o British Geological Survey, Murchison House, West Mains Road, Edinburgh EH9 3LA.

Back issues

Certain back numbers of the *Transactions of the Edinburgh Geological Society*, *Transactions of the Geological Society of Glasgow* and *Scottish Journal of Geology* are still available. A list of the prices and parts may be had on application to the secretaries of the Societies.

Book reviews

As space permits, the *Journal* will publish independent reviews of printed works that have a clear relevance to the geology of Scotland.
