

INDEX

Volume 41, 2005

Authors

- AUTON, C. A. 21–30
BALL, D. F. 3–11, 21–30, 61–68
BANKS, D. 69–79
BOWES, D. R. 175–188
BULAT, J. 81–86
CARLYLE, H. 1–2
CHAPMAN, R. J. 135–140
CHURCH, R. 31–37
CLEWS, J. 1–2, 13–20
DAVIDSON, R. G. 129–134
DEL RIO, M. 21–30
DULIN, S. 149–157
ELMORE, R. D. 149–157
ENGEL, M. H. 149–157
FETTES, D. J. 159–174
FITZSIMONS, V. 13–20, 21–30
FLINN, D. 141–148
FRENGSTAD, B. 69–79
GIBBINS, C. N. 39–49
GRAHAM, C. M. 159–174
HAMILL, B. J. 87–88
HANNAH, D. M. 39–49
HUGHES, A. G. 51–60
JACKSON, C. R. 51–60
KELLY, J. 149–157
LEAKE, R. C. 135–140
LILLY, A. 21–30, 61–68
LONG, D. 81–86
LOYDELL, D. K. 189–190
MACDONALD, A. M. 1–2, 3–11, 21–30, 61–68
MACDONALD, R. 159–174
MALCOLM, I. A. 39–49
MARSHALL, P. 97–104
MATHAVAN, V. 175–188
MORLAND, G. 69–79
Ó DOCHARTAIGH, B. É. 3–11, 21–30, 51–60
O'DRISCOLL, B. 119–128
OGLETHORPE, R. J. D. 141–148
PARK, R. G. 105–118
PARNELL, J. 149–157
PEACH, D. W. 51–60
POWELL, D. G. R. 119–128
REAVY, R. J. 119–128
ROBINS, N. S. 3–11, 51–60
SIMPSON, E. 13–20
SOULSBY, C. 39–49
STEPHENSON, D. 159–174
TETZLAFF, D. 39–49
TREWIN, N. H. 129–134
YOUNGSON, A. F. 39–49

Subjects

- acanthodian fish 129–134
actinopterygian fish 129–134
agriculture and groundwater nitrates 61–68
aquifer characterization 69–79
Argyll Group 159–174
Barrandeograptus 189–190
Barrovian metamorphism 175–188
biozones, Telychian 189–190
bivalves, Kirkwood Formation 87–88
Blackwater Formation 159–174
book reviews 89–96
brachiopods, Kirkwood Formation 87–88
Cairngorms, groundwater–surface water interaction 39–49
Central Greenland Craton 105–118
Cheiracanthus 129–134
Cheirolepis 129–134
chemical characterization of gold 135–140
Clachtoll, clastic dykes 149–157
clastic dykes, dating of 149–157
Clune 129–134
Connemara, Dalradian Supergroup development 119–128
contourites 81–86
Currywongaun intrusion 119–128
Dalradian Supergroup
 development in Ireland 119–128
 porphyroblast growth 175–188
 volcanics 159–174
dating by palaeomagnetism 149–157
Dawros–Currywongaun–Doughruagh Complex 119–128
debris fans 81–86
Deerhope Formation 189–190
Devonian, fish preservation 129–134
diffuse pollution and groundwater nitrates 61–68
dinosaur footprints 97–104
Diplacanthus 129–134
Diversograptus ramosus 189–190
Dumfries Basin aquifer 51–60
Faeroe–Shetland Channel 81–86
fish, Devonian 129–134
footprints, Jurassic 97–104
fossils *see* bivalves; brachiopods; fish; footprints; graptolites
Gairloch, clastic dykes 149–157
Gamrie, fish fossils 129–134
Girnock Burn, groundwater–surface water interaction 39–49
gold, alluvial 135–140

- graptolites, Silurian 189–190
- groundwater in Scotland
- flow modelling 51–60
 - introduction 1–2
 - nitrate levels 61–68
 - overview 3–11
 - recharge methodology 31–37
 - surface water interactions 39–49
 - vulnerability mapping 21–30
- gullies, linear 81–86
- hydrogeochemistry 69–79
- igneous textures 119–128
- Ireland, Dalradian Supergroup development 119–128
- Jurassic, footprints from Isle of Skye 97–104
- Kirkwood Formation 87–88
- Laxfordian deformation 105–118
- Lethen Bar, fish fossils 129–134
- Lewisian basement, clastic dykes in 149–157
- Lewisian Complex, terrane modelling review 105–118
- Lomond, Loch, Dalradian metamorphism 175–188
- magmatic layering, Dalradian 119–128
- Mennock Water, gold grains 135–140
- Mesacanthus* 129–134
- metamorphism and porphyroblast growth 175–188
- metavolcanics, Dalradian 159–174
- modelling, Lewisian terranes 105–118
- Monoclimacis* 189–190
- Nith, River 51–60
- nitrate vulnerable zones (NVZ) 61–68
- North Atlantic Craton 105–118
- North Esk Inlier 189–190
- numerical modelling, groundwater flow 51–60
- Oktavites spiralis* 189–190
- ophiolite complex of Shetland 141–148
- Orcadian Basin, fish fossils 129–134
- palaeomagnetism, dating of clastic dykes 149–157
- Pentland Hills, graptolite site 189–190
- pollution *see* diffuse pollution
- porphyroblasts, growth of 175–188
- Rhadinacanthus* 129–134
- rivers, groundwater interaction and 39–49
- sandstone dykes, dating of 149–157
- seismic sections (3-D) 81–86
- Shetland Ophiolite Complex 141–148
- Silurian, graptolites 189–190
- Skaw Granite 141–148
- Skye, Isle of, Jurassic footprints 97–104
- statistics, non-parametric 69–79
- terrane modelling, Lewisian 105–118
- theropod footprints 97–104
- Torrisonian Group 149–157
- trace fossils *see* footprints
- Tynet Burn, fish fossils 129–134
- Valtos Sandstone Formation 97–104
- volcanics, Dalradian 159–174
- Wanlockhead, gold grains 135–140
- Water Framework Directive 13–20, 31–37
- xenolith, Kirkwood Formation 87–88

Aim: The primary aim of the Journal is to publish papers relevant to the geology of Scotland and adjacent areas including the surrounding seas. Papers of general or specialist interest as well as short communications, letters to the editor, and discussions of earlier papers are welcome, together with reviews and thematic sets publishing the results of relevant meetings and conferences.

Submission: All contributions must be original. Papers, including figures and references should not normally exceed 12 printed pages. Typescripts should be sent to: The Editors, Scottish Journal of Geology, Geological Society Publishing House, Unit 7, Brassmill Enterprise Centre, Brassmill Lane, Bath BA1 3JN. Joint authors should indicate to whom proofs and correspondence should be sent.

Format: One complete copy of the full manuscript should be submitted with a MS Word file on disk or CD. Text, figures, captions and tables should be in separate files. Typescripts should be double-spaced throughout (including references) on A4 paper, on one side of the paper only, with a 25mm margin on each side. All pages should be numbered serially.

Title: brief and specific. Name(s) and address(es) of author(s) (including an e-mail address for the corresponding author). Synopsis: must be intelligible without reference to the paper and should not exceed 200 words. Main body of paper, subdivided into 1st, 2nd, and 3rd order headings (see recent issue for styles). Acknowledgements. Appendices. References: NAME, A. B. Year. Title. [*In* Name, C. D. & Name E. F. (eds) *Title*. Publisher, place, pages] *Journal*, **vol.**, pages. Tables. Captions for figures. Figures.

Text: Authors should ensure consistency in their use of capitals, hyphens and punctuation. Underlining should be used only to indicate words in italics, e.g. fossil names. Footnotes should be avoided. References in the text should be separated by a semicolon and appear in chronological order (Hutton 1795; Hutton & Smith 1805; Werner 1874). Reference in the text to papers with more than two authors should be made thus: (Smith *et al.* 1975) but cited in full in the reference list.

References: List all references cited in text, figures and tables. They should be double spaced, in alphabetical order of the authors' names with '*et al.*' entries listed chronologically. Repeated author names and journal titles should be given in full. Unpublished material and manuscripts submitted to a journal but not yet accepted should not be cited. Personal communications are preferable to inaccessible unpublished reports.

Figures: Page size is 252 x 176 mm; column width is 85mm. Figures should be prepared to fit either a page or column width leaving space for the caption. They must be

numbered consecutively and referred to in the text in that order. Make sure that scales and north arrows are included where appropriate. Please provide print outs that are exactly the same as the material on the disc. Acceptable graphics packages are Corel Draw, Adobe Illustrator and Aldus Freehand. Ensure that fine lines are saved as actual line widths of at least 0.5 pt. Do not use fine-line default settings (minimum width or hairline) or fine shading; on a high-resolution output device such as a film-setter they may be too fine to show up in print. This problem cannot be detected in proofs, which are produced with a laser printer. No letters, after reduction, should be less than 1mm high.

Figures should be supplied as EPS files with fonts embedded and a tiff preview. If EPS files are not an option, we can accept high resolution (1000 dpi) bit map TIFFs (or JPEG, GIF).

Photographs or halftones can be provided as EPS or greyscale TIFF files (recommended resolution of >300dpi). A scale bar should be used on photographs.

Colour may be used, but authors wishing to do so must contact the editors. Authors are expected to contribute towards the cost of colour reproduction. Similarly, folded figures are expensive, and editors must be consulted. Colour must be saved as CMYK (not RGB).

Tables: Tables should go across single or double column width. Vertical and horizontal rules should be avoided. Tables must be provided as Word, Excel or .rtf files.

Supplementary publication scheme: Detailed material such as locality lists and analytical data, will be made available as Supplementary Publications. These files are stored at the British Library and the Geological Society's library and are hosted on the Society's website. Acceptable formats for the online repository are: .rtf, .csv and .pdf. Maximum size is 5 MB per paper (can be zipped if necessary).

Offprints/pdfs: Offprint copies of papers will be provided at cost if ordered when the corrected proofs are returned to the publisher. Copies are normally distributed soon after publication. The journal is available online through ingentaconnect (www.ingentaconnect.com/journals/browse/geol/sjg). Authors will be sent instructions on how to obtain pdfs.

Copyright: The *Scottish Journal of Geology* is the joint property of the Geological Society of Glasgow and the Edinburgh Geological Society, in whom the copyright rests. Queries regarding copyright should be directed to the secretaries of the Societies. Papers accepted for publication are deemed to be the property of the Editorial Board acting on behalf of the Societies unless specific arrangements are made to the contrary.

More information, including contents of recent issues can be found on the Journal's WWW page:
