

INDEX

Volume 47, 2011

Authors

- ANDERSON, T. B. 33–43
AUTON, C. A. 157–167
BARBER, A. J. 113–132
BATCHELOR, R. A. 133–142
BLUCK, B. J. 92–93
BONSOR, H. C. 1–20
BRADWELL, T. 169–178
BRAITHWAITE, C. J. R. 179–188
BREWARD, N. 33–43
BURROW, C. J. 101–111
CALDWELL, W. G. E. 21–32, 143–156
DAVIDSON, R. G. 101–111
DEN BLAAUWEN, J. L. 101–111
DIAZ-TUSHMAN, K. 45–56
DUCK, R. W. 81–87
EICHHUBL, P. 45–56
FLIGHT, D. 33–43
FLOYD, J. D. 57–66
GOMEZ, L. 45–56
GOODENOUGH, M. 1–20
HALL, A. M. 157–167
HOOKER, J. N. 45–56
HOWE, J. 169–178
KRABBENDAM, M. 1–20
LAUBACH, S. E. 45–56
LESLIE, A. G. 1–20
MARRETT, R. 45–56
MCINTYRE, K. 169–178
MEIDLA, T. 57–66
MICHIE, U. McL. 157–167
MOHIBULLAH, M. 57–66
NEWMAN, M. J. 101–111
PEARSON, S. G. 157–167
PINZON, E. 45–56
RIDING, J. B. 157–167
SIVETER, D. J. 57–66
STONE, P. 33–43
STRACHAN, R. A. 1–20
TANNER, P. W. G. 89–91
VANDENBROUCKE, T. R. A. 57–66
WILLIAMS, M. 57–66
YOCHELSON, E. L. 67–79
YOUNG, G. M. 21–32, 143–156
ZALASIEWICZ, J. A. 57–66

Subjects

- Acanthodii 101–111
Achness Thrust Sheet 1–20
Arctica islandica 169–178
Ardwell Farm Formation 57–66

Ballagan Formation 143–156
book reviews 94–100, 189–190
British Ice Sheet (BIS) 157–167
Bute, Isle of 143–156

¹⁴C dating, Loch Hourn deglaciation 169–178
Cambrian, Eriboll Formation 45–56
Carboniferous
 Firth of Clyde stratigraphy 143–156
 Scaphopoda 67–79
 volcanism in Midland Valley 21–32
Cephalopoda 67–79
clay precipitation, history of study 81–87
climate change, history of study 179–188
Clyde Plateau Volcanic Formation 21–32, 143–156
Clyde Sandstone Formation 21–32, 143–156
Colonsay Group 133–142

deglaciation, Sound of Sleat 169–178
deltaic environments, history of study 81–87
denudation rates, history of study 81–87
Devonian, fish fossils 101–111

Diabaig Formation 133–142
discussions 89–91, 92–93
Drumhollistan Till 157–167

earthquakes of Scotland 179–188
Eriboll Formation, fracture patterns 45–56
estuarine environments, history of study 81–87
Euthacanthus gracilis 101–111

fish fossils, Early Devonian acanthodian 101–111
fossils *see* fish; ostracods; scaphopoda
fracture intensity, Eriboll Formation 45–56
friction on particles 81–87

Gala Group 33–43
geochemistry
 Carboniferous tuffs 21–32
 Southern Uplands–Down-Longford terrane 33–43
 Torridonian tuffs 133–142
Geodh' Easgaidh Gravel 157–167
geological time, history of study 179–188
Girvan, Ordovician ostracods 57–66
glacigenic sediments, Sleat Channel 169–178
Glenelg-Attadale Inlier 113–132
Great Cumbrae, Carboniferous volcanism 21–32

Hawick Group 33–43
Highland Border Complex, discussions 89–91, 92–93

- Highland Boundary Fault, discussions 89–91, 92–93
 history of geology, 19th century studies 81–87, 179–188
 Holocene, onset 169–178
 Hourn, Loch, deglaciation 169–178
 Hyolitha 67–79
- ice flow
 deglaciation of Loch Hourn 169–178
 patterns in northern Scotland 157–167
- Inverclyde Group 21–32, 143–156
- Kilchattan Formation 133–142
 Kilchiaran Formation 133–142
 Kinnesswood Formation 143–156
- Last Glacial Maximum (LGM) 157–167
 Lewisian and Lewisianoid gneiss 113–132
 Llandoverly, geochemistry in sedimentary provenances 33–43
 Loch na Dal Formation 133–142
- Machrins formations, Lower and Upper 133–142
 maps of Scotland, history of 179–188
- Midland Valley
 Carboniferous volcanism 21–32
 Early Devonian acanthodian 101–111
- mineralogy, history of 179–188
- Moine Nappe Complex 1–20
 Moine Thrust Zone 113–132
- Mollusca 67–79
- moraines, Sound of Sleat 169–178
- Morar Group 1–20
 Moray Firth ice 157–167
 multibeam survey, Sound of Sleat 169–178
- Neoproterozoic, structural geology 1–20
- Nith, River 81–87
- Northern Highlands ice 157–167
- Northwest Highlands, structural geology 1–20
- Old Red Sandstone, fish fossils 101–111
- Ordovician
 geochemistry in sedimentary provenances 33–43
 ostracods 57–66
- ostracods, Ordovician 57–66
- palaeontology
 history of study 179–188
- see also* fish; ostracods; scaphopoda
- pebble shape, history of study 81–87
- petrology, history of 179–188
- phosphorite geochemistry 133–142
- Pleistocene
 deglaciation 169–178
 ice flow patterns 157–167
- Portskerra Till 157–167
- Pownie, James 101–111
- radiocarbon dating, Loch Hourn deglaciation 169–178
- Reisgill Burn 81–87
- salinity, history of study 81–87
- Sandbian, ostracods 57–66
- Scaphopoda, Carboniferous 67–79
- sedimentation rates, history of study 81–87
- Sleat Group, Lower 133–142
- Sleat, Sound of 169–178
- Southern Uplands–Down–Longford terrane 33–43
- stratification, history of study 81–87
- stratigraphy
 Carboniferous of Firth of Clyde 143–156
 Morar Group 1–20
 Torridonian 133–142
- structural geology
 Glenelg–Attadale Inlier 113–132
 Moine Nappe Complex 1–20
- Tay Estuary 81–87
- Torridonian, tuff geochemistry 133–142
- Tournaisian, volcanism in Midland Valley 21–32
- Transactions of the Edinburgh Geological Society* 179–188
- Transactions of the Geological Society of Glasgow* 179–188
- tuffs
 Carboniferous 21–32
 Torridonian 133–142
- Vermes 67–79
- volcanism, Carboniferous of Midland Valley 21–32
- Wester Clett, glaciogenic sediments 157–167
- Younger Dryas 169–178

Notes to assist authors planning to submit items for publication in the Scottish Journal of Geology

Aim: The primary aim of the Journal is to publish papers relevant to the geology of Scotland and adjacent areas including the surrounding seas. Papers of general or specialist interest as well as short communications, letters to the editor, and discussions of earlier papers are welcome, together with reviews and thematic sets publishing the results of relevant meetings and conferences.

Submission: All contributions must be original. Papers, including figures and references should not normally exceed 12 printed pages. A pdf or Word file of the typescript should be sent to: sally.oberst@geolsoc.org.uk. No hard copy is required. Joint authors should indicate to whom proofs and correspondence should be sent.

Format: A pdf of the paper may be submitted for review purposes. On acceptance, MS Word files of the text, captions and tables are required. The text file should include: Title: brief and specific. Name(s) and address(es) of author(s) (including an e-mail address for the corresponding author). Synopsis: must be intelligible without reference to the paper and should not exceed 200 words. Main body of paper, subdivided into 1st, 2nd, and 3rd order headings (see recent issue for styles). Acknowledgements. Appendices. References: NAME, A. B. Year. Title. [*In Name, C. D. & Name E. F. (eds) Title. Publisher, place, pages*] *Journal*, vol., pages. Tables. Captions for figures. Figures.

Text: Authors should ensure consistency in their use of capitals, hyphens and punctuation. Underlining should be used only to indicate words in italics, e.g. fossil names. Footnotes should be avoided. References in the text should be separated by a semicolon and appear in chronological order (Hutton 1795; Hutton & Smith 1805; Werner 1874). Reference in the text to papers with more than two authors should be made thus: (Smith *et al.* 1975) but cited in full in the reference list.

References: List all references cited in text, figures and tables. They should be double spaced, in alphabetical order of the authors' names with '*et al.*' entries listed chronologically. Repeated author names and journal titles should be given in full. Unpublished material and manuscripts submitted to a journal but not yet accepted should not be cited. Personal communications are preferable to inaccessible unpublished reports.

Figures: Page size is 252 x 176 mm; column width is 85mm. Figures should be prepared to fit either a page or column width leaving space for the caption. They must be numbered consecutively and referred to in the text in that order. Make sure that scales and north arrows are

included where appropriate. Acceptable graphics packages are Corel Draw, Adobe Illustrator and Aldus Freehand. Ensure that fine lines are saved as actual line widths of at least 0.5 pt. Do not use fine-line default settings (minimum width or hairline) or fine shading; on a high-resolution output device such as a film-setter they may be too fine to show up in print. This problem cannot be detected in proofs, which are produced with a laser printer. No letters, after reduction, should be less than 1mm high.

Figures should be supplied as EPS files with fonts embedded and a tiff preview. If EPS files are not an option, we can accept high resolution (1000 dpi) bit map TIFFs (or JPEG, GIF).

Photographs or halftones can be provided as EPS or greyscale TIFF files (recommended resolution of >300dpi). A scale bar should be used on photographs.

Colour may be used, but authors wishing to do so must contact the editors. Authors are expected to contribute towards the cost of colour reproduction. Similarly, folded figures are expensive, and editors must be consulted. Colour must be saved as CMYK (not RGB).

Tables: Tables should go across single or double column width. Vertical and horizontal rules should be avoided. Tables must be provided as Word, Excel or .rtf files.

Supplementary publication scheme: Detailed material such as locality lists and analytical data, will be made available as Supplementary Publications. These files are hosted on the Geological Society of London website. Acceptable formats for the online repository are: .rtf, .csv, .gif and .pdf. Maximum size is 20 MB per paper (can be zipped if necessary).

Offprints/pdfs: Offprint copies of papers will be provided at cost if ordered when the corrected proofs are returned to the publisher. Copies are normally distributed soon after publication. The journal is available online as part of the Lyell Collection (www.lyellcollection.org). Authors will be sent instructions on how to obtain pdfs.

Copyright: The *Scottish Journal of Geology* is the joint property of the Geological Society of Glasgow and the Edinburgh Geological Society, in whom the copyright rests. Queries regarding copyright should be directed to the secretaries of the Societies. Papers accepted for publication are deemed to be the property of the Editorial Board acting on behalf of the Societies unless specific arrangements are made to the contrary.
