The Scottish Journal of Geology continues the Transactions of the Edinburgh Geological Society and the Transactions of the Geological Society of Glasgow, and is sponsored by the councils of the two societies. It contains two parts per volume. The Journal is sent to members of both societies. Details of membership may be obtained from the secretaries, whose names appear below.

Contributions or legacies to assist towards the cost of publication of the Journal would be welcomed by the Editorial Board.

Front cover illustration

Looking NW up the River Moriston from the top of the Falls to the road bridges at Invermoriston. The nearer bridge was completed in 1983 and carries the present A92 road (Fort William – Inverness). The dual arch bridge behind was built to the design of Thomas Telford and completed in 1813. It took 5 years to build due to "the idleness of workers and an inattentive contractor". The rocks in the foreground are interbedded psammitic and semipelitic with the bedding dipping some 25° to the ESE.

They are assigned to the Achnacrathan Striped Formation, shown on the Invermoriston map as belonging to the Glenfinnan Group of the Moine Supergroup. The pelitic beds are gneissose in part with quartzofeldspathic segregation veins and pods. There may also be thin amphibolite mafic units present in the succession as they are common here (recorded by the bridge). The area was mapped by Frank May, mainly in 1983.

The online + print subscription prices for 2013 to institutions and non-Fellows is: £284.11 (UK), £284.11 (EU), £242.00 (RoW). Prices include tax. More information about subscription options can be found at http://www.geolsoc.org.uk/LyellCollection

Trade subscription enquiries should be addressed to the Journal Subscriptions Department, Geological Society Publishing House, Unit 7, Braesmill Enterprise Centre, Braesmill Lane, Bath BA1 3NJ, UK (Tel 01225 445046; fax 01225 442836).

Airfreight and mailing in the USA by agent named Air Business Ltd, c/o WorldNet Shipping Inc., 156-15, 146th Avenue, 2nd Floor, Jamaica, NY 11434, USA.

Periodicals postage paid at Jamaica NY 11431, US Postmaster: send address corrections to Scottish Journal of Geology, Air Business Ltd, c/o WorldNet Shipping Inc., 156-15, 146th Avenue, 2nd Floor, Jamaica, NY 11434, USA.

Notes to assist authors planning to submit items for publication in the Scottish Journal of Geology

Aim: The primary aim of the Journal is to publish papers relevant to the geology of Scotland and adjacent areas including the surrounding seas. Papers of general or specialist interest as well as short communications, letters to the editor, and discussions of earlier papers are welcome, together with reviews and thematic sets publishing the results of relevant meetings and conferences.

Submission: All contributions must be original. Papers, including figures and references should not normally exceed 12 printed pages. A pdf or Word file of the typescript should be sent to: sally.obert@geolsoc.org.uk. No hard copy is required. Joint authors should indicate to whom proofs and correspondence should be sent.

Format: A pdf of the paper may be submitted for review purposes. On acceptance, MS Word files of the text, captions and tables are required. The text file should include: Title: brief and specific. Name(s) and address(es) of author(s) (including an e-mail address for the corresponding author). Synopsis: must be intelligible without reference to the paper and should not exceed 200 words. Main body of paper, subdivided into 1st, 2nd, and 3rd order headings (see recent issue for styles). Acknowledgements. Appendices. References: NAME, A. B. Year. Title. In [Name, C. D. & Name E. F. (eds) Title. Publisher, place, pages]. Journal, vol., pages. Tables. Captions for figures. Figures:

Text: Authors should ensure consistency in their use of capitals, hyphens and punctuation. Underlining should be used only to indicate words in italics, e.g. fossil names. Footnotes should be avoided. References in the text should be separated by a semicolon and appear in chronological order (Hutton 1795; Hutton & Smith 1805; Werner 1874). Reference in the text to papers with more than two authors should be made thus: (Smith et al. 1975) but cited in full in the reference list.

References: List all references cited in text, figures and tables. They should be double spaced, in alphabetical order of the authors’ names with ‘et al.’ entries listed chronologically. Repeated author names and journal titles should be given in full. Unpublished material and manuscripts submitted to a journal but not yet accepted should not be cited. Personal communications are preferable to inaccessible unpublished reports.

Figures: Page size is 252 x 176 mm; column width is 85mm. Figures should be prepared to fit either a page or column width leaving space for the caption. They must be numbered consecutively and referred to in the text in that order. Make sure that scales and north arrows are included where appropriate. Acceptable graphics packages are Corel Draw, Adobe Illustrator and Aldus Freehand. Ensure that line sizes are saved as actual line widths of at least 0.5 pt. Do not use fine-line default settings (minimum width or hairline) or fine shading; on a high-resolution output device such as a film-setter they may be too fine to show up in print. This problem cannot be detected in proofs, which are produced with a laser printer. No letters, after reduction, should be less than 1mm high.

Figures should be supplied as EPS files with fonts embedded and a tiff preview. If EPS files are not an option, we can accept high resolution (1000 dpi) bit map TIFFs (or JPEG GIF).

Photographs or halftones can be provided as EPS or greyscale TIFF files (recommended resolution >300dpi). A scale bar should be used on photographs.

Colour may be used, but authors wishing to do so must contact the editors. Authors are expected to contribute towards the cost of colour reproduction. Similarly, folded figures are expensive, and editors must be consulted. Colour must be saved as CMYK (not RGB).

Tables: Tables should go across single or double column width. Vertical and horizontal rules should be avoided. Tables must be provided as Word, Excel or .rtf files.

Supplementary publication scheme: Detailed material such as locality lists and analytical data, will be made available as Supplementary Publications. These files are hosted on the Geological Society of London website. Acceptable formats for the online repository are: .rtf, .csv, .gif and .pdf. Maximum size is 20 MB per paper (can be zipped if necessary).

Offprints/pdfs: Offprint copies of papers will be provided at cost if ordered when the corrected proofs are returned to the publisher. Copies are normally distributed soon after publication. The journal is available online as part of the Lyell Collection (www.lyellcollection.org). Authors will be sent instructions on how to obtain pdfs.

Copyright: The Scottish Journal of Geology is the joint property of the Geological Society of Glasgow and the Edinburgh Geological Society, in whom the copyright rests. Queries regarding copyright should be directed to the secretaries of the Societies. Papers accepted for publication are deemed to be the property of the Editorial Board acting on behalf of the Societies unless specific arrangements are made to the contrary.
